

MORE FROM WOOD.

EGGER WORKTOPS

As versatile as life

ZOOM[®]
THE EVERYDAY RESOURCE

EGGER WORKTOPS – CONVINCINGLY VERSATILE

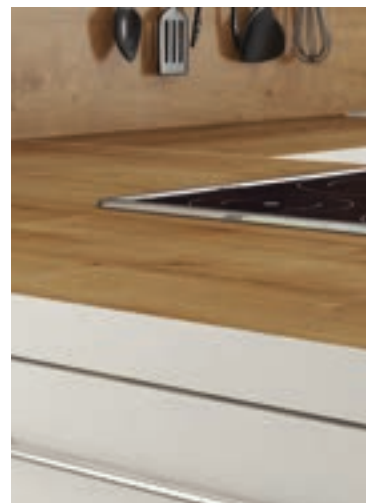

With more than 50 years of experience in the production of wood-based materials, the laminated worktop has proven itself as an ideal material for surfaces that are subject to increased strain. Maximum design flexibility with hygienic easy-care surfaces, straightforward processing and resource conservation in production speak for themselves. In this brochure, we present you with a selection of decors from the EGGER worktop collection and show you why this material truly is as versatile as life itself. We also provide you with examples of various applications for our decors.

- ☐ ABS Edging
- ☐ EUROSPAN® Worktop

SETTING ACCENTS

Light uni colours are currently popular for kitchen front elements. This has seen an increase in the demand for vibrant colours and expressive wood grains as accents. These more expressive and natural wood grains, used as worktops, are ideal in combination with high-contrasting stone reproductions.

UNUSUAL TYPES OF WOOD

In a neutral, uni colour kitchen, the worktop can serve as an eye catcher. Wood reproductions, such as a special butcher block composition like H1189 ST10 Smoked Brown Bonanza Oak, are very well suited here. H3012 ST22 Coco Bolo and H2572 ST9 Woodstock with narrow planking and its interplay of light and dark wood hues exhibit an exotic yet also modern appearance.

Unusual types of wood in combination with uni colours are truly eye-catching

Create fascinating contrasts with EGGER worktops.

THE WORKTOP MAKES THE DIFFERENCE

Experiment by combining a simple kitchen with a worktop that creates a fascinating contrast: while F105 Torano Marble is neutral in colour, large-scale veins nevertheless make this worktop an eye catcher. Or choose F403 ST10 Vulcano Brown, bringing the popular used look to the kitchen. F214 ST10 Peacock Slate or F276 ST9 Arkosa Sand feature a highly realistic finish which is also found in matching matt or rough surfaces.

EXHIBIT PROFESSIONALISM

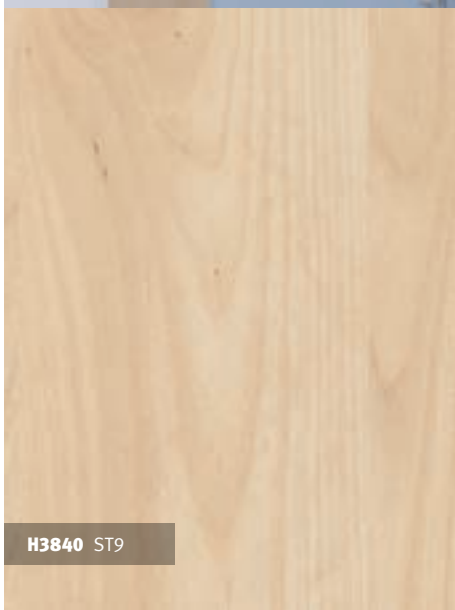

The product name is the game: also suitable for office applications, for example as a desktop or conference table. EGGER worktops feature a robust and realistic appearance – in classic as well as more expressive wood types.

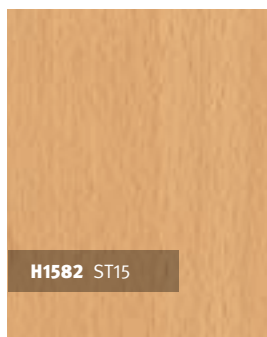

OFFICE CLASSICS

Classic woodgrain decors have been updated in the new ZOOM® collection, now blending perfectly into a modern context as work surfaces as well. H3840 ST9 Mandal Maple for example appears highly realistic. H1615 ST9 Cherry Romana features a modern yet neutral colouring. The elegant, dark classic H3704 ST15 Tobacco Aida Walnut and the fresh H1582 ST15 Ellmau Beech are highly popular in the field of office design.

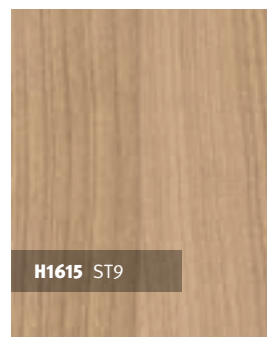

Classic types of wood create a pleasant atmosphere in the workplace.

H3704 ST15

Trendy decors create the perfect environment for inspiration and creativity

EXPLORING NEW HORIZONS

New ideas are always in demand at work – so why not design an innovative conference table, for example with material decors such as the highly popular F275 ST9 Dark Concrete or F633 ST15 Grey Brown Metallo with the appearance of oxidised metal. Textured, more striking wood effects are an excellent choice for larger tabletops, for example H1145 ST10 Natural Bardolino Oak with rough cut elements or H1150 ST10 Authentic Oak with a 'used look'. In combination with the texture 'ST10 Authentic', these woodgrain decors also become more tactile.

Lively wood types bring naturalness to simple shapes

EXPRESSIVE WOODGRAINS

H3303 ST10 Natural Arlington Oak displays a natural feel with knots and planking. In a contemporary, white kitchen, such a worktop combines design and nature. With its appearance of cracks, H3332 ST10 Grey Nebraska Oak exhibits a similar rough character in a natural hue. The expressive H3739 ST15 Walnut Butcher-Block with its expansive colour spectrum can be combined with many neutral uni colours.

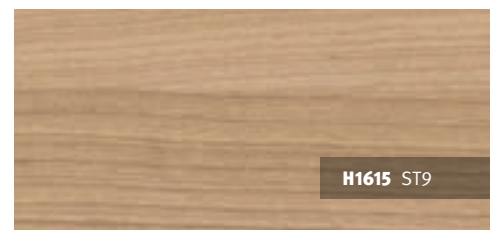

CREATING AN ATMOSPHERE

Modern kitchens set themselves apart through their simple design. It can be enhanced by a worktop with a natural look. Choosing muted, dark wood hues is recommended in order to create a warm, light-dark contrast.

WARM WOOD HUES

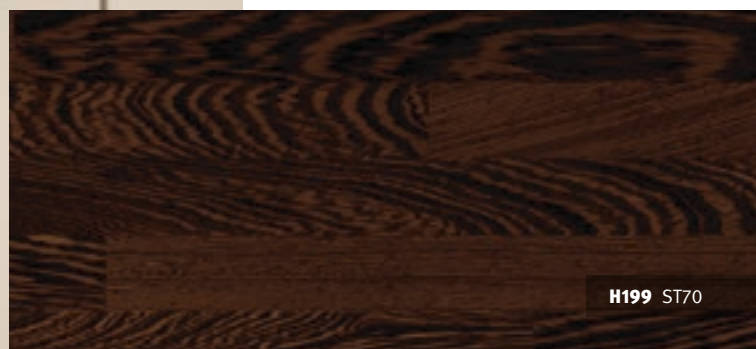

Warm wood hues in combination with uni colours from cream to vanilla create a traditional feel. The contrast can be varied – from a moderate hue such as H1615 ST9 Romana Cherry to the reddish, classic H178 ST15 Afzelia Butcher-Block to the exotic, dark H199 ST70 Wenge Butcher-Block, you can create a combination of your choice.

H1615 ST9

H178 ST15

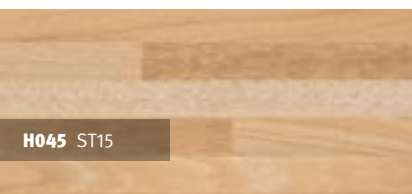

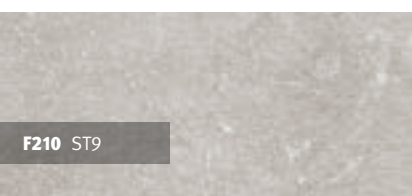

H199 ST70

Warm, light-dark contrasts create a traditional feel.

A CLEAN FINISH

Easy to clean surfaces are leading concerns in public applications. The seamless transition from the surface to the edging meets this requirement. For the right design, our worktop collection offers an extensive selection that ranges from natural stone reproductions to elegant wood reproductions.

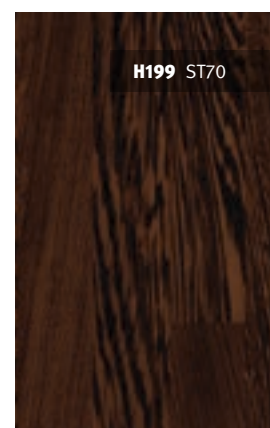

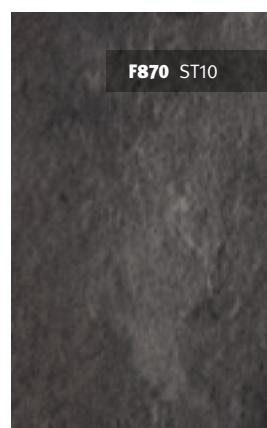

Used look – ideal for modern shop fitting

REFRESHINGLY DIFFERENT

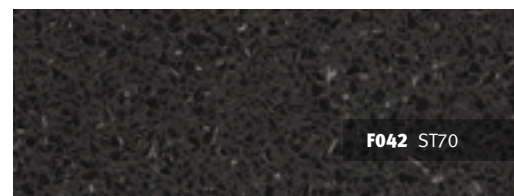

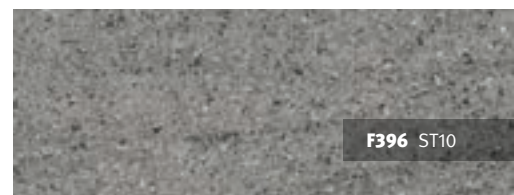

While used look materials are in great demand for shop fitting applications, they fail to exhibit the surface properties required for the work surface as genuine materials. In keeping with current trends, F403 ST10 Vulcano or F210 ST9 Amalvi Marble create a modern yet authentic look. H045 ST15 Light Planked Timber and F292 ST9 Tivoli Beige are elegant wood and stone designs.

AN IMPRESSIVE SETTING

A restaurant needs to have an atmosphere that makes an impression. At the same time, the overall purpose of the chosen materials must be maintained at all times. EGGER worktops combine robustness with a high-end appearance. Examples include F148 ST82 Valentino Light Brown, F390 ST82 Valetta Sand and F870 ST10 Leon Slate, but also exclusive woodgrain decors such as H199 ST70 Wenge Butcher-Block.

Create an ambiance with easy-care materials

EGGER worktops are ideal in public applications with durability and a timeless design

RELIABLE DAY AFTER DAY

Durable surfaces can be readily combined with a timeless design in public areas. Suitable decors include the modern marble F213 Lazio Anthracite, the timeless F274 ST9 Light Concrete and the classic mineral stone F042 ST70 Sonora Black. F396 ST10 Basaltino Grey appeals with its cool elegance, which also imparts the tactile impression of a granite material by its feel.

LONG-LASTING DESIGN

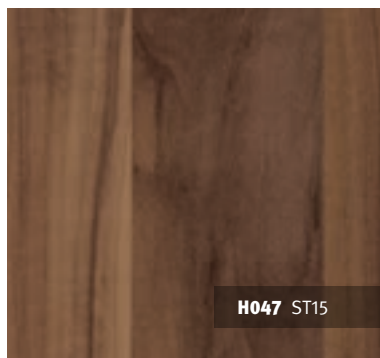

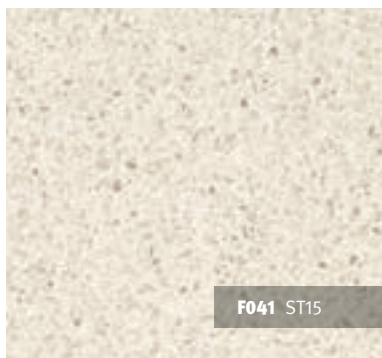

High customer frequency leads to special demands on materials. This is where EGGER worktops are an ideal choice for applications ranging from shop fitting to office spaces. You too can benefit from a selection of expressive yet elegant decors that consistently meet these requirements.

WELLBEING IN ANY SITUATION

A material can give a room a special character. EGGER worktops establish a positive atmosphere, even in applications with special requirements – such as a doctor's office. The sandstone F277 ST9 Arkosa Grey with its elegant and warm texture appears highly inviting at a reception. F041 ST15 Sonora plays with the topic of white as a mineral stone. With a worktop in H047 ST15 Dark Plum Butcher-Block, it is even possible to give the impression of solid wood in such an application.

Even when strict requirements have to be met, no design compromises need to be made with the use of EGGER worktops.

EGGER worktops – best quality and appearance

ACCESSORIES

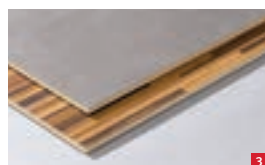

Matching laminate splashback panels and worktop-wall profiles with a large selection of accessories are also available.

HIGH QUALITY – A MATTER OF COURSE FOR EGGER

EGGER has been producing laminate worktops for more than 20 years. Time that was used for continuous optimisation. Which is why you will find small but crucial differences in the quality of EGGER worktops ...

COMPOSITION OF THE EGGER WORKTOP

- 1 EGGER Laminate Flex 0.6 mm (EN 438-2)
- 2 Radius 3 mm
- 3 PUR sealing
- 4 UV protection coating
- 5 Moisture-repellent balancer paper
- 6 EVA hot melt adhesive sealing
- 7 EUROSPAN® raw chipboard E1
- 8 EGGER support edging

Model 300/3
Further models upon request.

PRODUCT PROPERTIES

Matching edging included

Easy to clean

High impact and scratch resistance

Moisture-repellent surface

Food-safe

Excellent resistance against abrasion

EGGER SUPPORT EDGING – THE HIGHEST QUALITY

Perfection down to the details: special support edging ensures that EGGER worktops exhibit matching materials properties, even in post-forming applications. This allows us to achieve a perfect appearance, both on the surface and along the edge, combined with excellent stability and ideal processing characteristics.

POWERFUL EFFECT THROUGH THE HARMONISATION OF DECOR AND TEXTURE

With ZOOM® the chosen surface texture enhances the decor. Here you can see an overview of all worktop textures.

ST10 Authentic – A surface for natural, striking and rustic decors probably doesn't get more authentic than this. It is the perfect surface for solid wood reproductions.

ST15 Office – This universal surface is suitable for intensive uni colours. It also highlights the appearance of elegant woodgrain decors.

ST11 Natural Pore – The irregular matt and gloss woodgrain gives this surface a very natural appearance.

ST22 Matex – Thanks to its feel and matt-gloss areas, it gives linear and lively woodgrain decors more naturalness and depth for a more realistic wood-like finish.

ST70 Elegance – The even surface with a lower gloss level works well with fantasy decors, in particular with stone & mineral decors.

ST82 Granito – This deep embossed surface with robust surface properties provides especially stone decors a natural sand blasted effect.

ST9 Perfect Matt – Gives uni colours and woodgrain decors a very natural feel and follows the matt surface trend.

ST2 Diamond – Robust, striking and very durable, this surface is best used with uni colours and applied on classic application areas.

ST22 MATEX

Kitchen front in H1487 ST22 Bramberg Pine reveals rustic depth.
