

Melamine Faced Boards

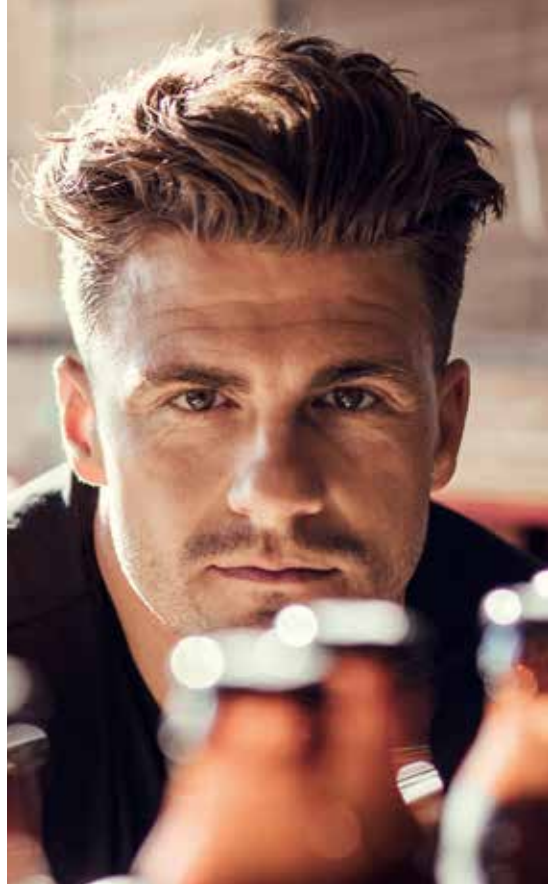

Wood at its best

POLSKA

PL

We like to arrange flats our way...

Dear Customer,

When creating a new decor collection of Melamine Faced Boards we asked ourselves: how do we arrange our flats today? What emotions accompany us in this process?

We asked many social groups about this from various parts of Poland and it became clear that TODAY THE EMPHASIS IS ON INDIVIDUALISM.

It turns out that we like to be inspired by our friends' apartments, we bring ideas and solutions from our travels, we search for inspiration in news and on interior-oriented websites – all in order TO ADJUST EVERYTHING TO OUR INTERIORS AND NEEDS.

We draw pleasure from designing, combining what we like and doing something the way we like it.

This is why we designed the new collection of furniture boards in a way to give you a huge number of arrangement possibilities so that everyone can draw pleasure from the creation of color sets that suit personal taste.
DO IT YOUR WAY. THE WAY YOU LIKE IT.

Kasia

Independent and proud. A lawyer.

She mostly spends her free time reading books or watching films.

She does not plan, she'd rather experience what fate has in store for her.

I selected the colors in the apartment myself and of course, I was inspired by nature.
It is very important to select something on your own, I feel best at such a place.

Paweł

A mini beer producer.

An optimist, though he is aware of how difficult life can be.

He is ready for possible problems and failures, but even if they occur, he never gives up.

How did I arrange my flat? Step by step, no rush. Then it's a lot of fun. I designed this cupboard by myself. It took some time, but the effect really surprised me!

CYLINDER PATTERN

Basia

Barbara is a collector of experiences. She loves travelling, discovering new places and meeting people who turn out to have a completely different mentality than those she met so far, and that's only because they live in a different part of the country. She reads a lot and watches a lot of programs that familiarize her with parts of the world she will never be able to travel to.

When I was arranging my flat, I had a problem with making a decision! I am inspired by too many things. This is why I simply buy what I like, and sometimes this creates weird combinations, but I feel good with that.

D 3288 MX
CREAM LARCH

the change of the direction
of the wood grain adds dynamics
and enriches the composition

Tomek

A photographer. A man of calm, melancholy even. Tomek is characteristic for his care and loyalty towards the person he befriends or loves. Due to his worldview, he excels at being a photography artist.

I like rearranging furniture. You move a few things and you have a different perspective. The best thing about arranging things at home was that I could associate the colors and wood drawings to my grandma's flat, without losing anything of personal character. You feel "at home" and maintain the warmest memories at the same time.

CYLINDER PATTERN

COMBINE, TURN AROUND, EXPERIMENT!

Furniture, its form, shapes and colors, play the main role in every room. The way we combine patterns and colors significantly influences the aesthetics of the interior.

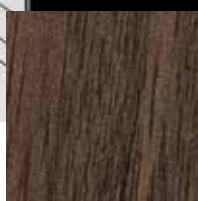

The first thing that we pay attention to when selecting a furniture board or a worktop is its color and decor pattern. This, however, is not the end of our adventure with interior arrangement. This is where the fun begins.

Depending on the atmosphere that we want to achieve, we can arrange different patterns and colors, creating contrasting compositions or toned-down and subtle combinations.

We achieve an incredible effect by arranging a pattern in different directions. It is up to our imagination to create the most distinct furniture.
