Availability Guide
MFC and matching materials

Eurodekor Melamine Faced Board (MFC)
2800 x 2070 mm sheet size
Standard: 18 mm thickness
Other thicknesses: 8, 12, 15, 16, 22, 25, 28, 30, 38 mm
MR MFC: Moisture resistant board 15, 16 & 18 mm thickness

PerfectSense Lacquered Board (⇢ page 16-19)
2800 x 2070 x 19 mm sheet size

MDF
We offer Melamine faced MDF in both standard grade and MB (Membrane) grade.
MB is supplied with a decorative finish to one side only.

Edging (⇢ page 20-21)
As well as the edging dimensions shown we can also cut the specific width you require.
We also have 'Accent edging' now available.

Laminate (⇢ page 24-25)
Standard size: 3050 x 1310 x 0.8 mm
XL format: 2790 x 2060 x 0.8 mm
Coloured Core: 2800 x 1310 x 0.8 mm

Eurolight Lightweight Panels (⇢ page 22-23)
2800 x 2070 mm sheet size
Thickness: 38, 50 mm

● In stock
○ Available with a delivery time
* When 2 textures are indicated it denotes the texture on the top and bottom of the board
Only for vertical application (Pearlescent Decor)

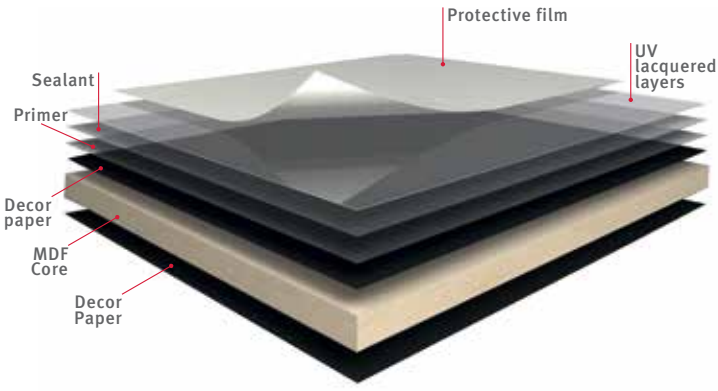
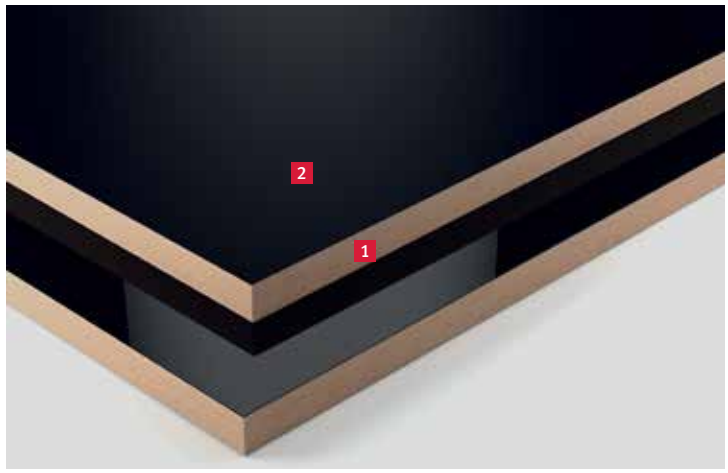
PerfectSense Lacquered Boards

PerfectSense Matt & Gloss Lacquered Boards

PerfectSense is a new range of premium high-gloss and matt lacquered MDF boards. The high quality EGGER MDF boards combined with this new range of premium lacquered surfaces make PerfectSense the ideal option for premium furniture and interior design projects.

Thanks to the innovative new coating process, based on UV lacquered technology, the PerfectSense Matt decors have an anti-fingerprint surface protection whilst the PerfectSense Gloss surface has a highly reflective, glass-like finish.





1 MDF core board
2 PerfectSense Matt or Gloss finish

The EGGER MDF core of PerfectSense helps to create the smooth high-end finish, both in the matt and the gloss decors. The inert UV technology used to create the surface of the PerfectSense board means that they are scratch and heat resistant and have a durability designed to last.

The PerfectSense Matt or Gloss finish is featured on the top of the board, on the reverse is a matching colour with a ST2 texture.

The standard board size is 2800 x 2070 mm with a thickness of 19 mm.

All PerfectSense Matt and Gloss decors have a matching edging offer. A coordinated ABS edge in 23 x 1.0 mm is available, alternatively a coordinated PMMA edging in 23 x 1.3 mm is also stocked.

All PerfectSense boards are supplied with a protective film to protect the finish during fabrication and handling.

The processing of PerfectSense boards differ from melamine faced boards. Please see www.egger.com/perfectsense for processing details.

Technical data sheet and processing advice can be downloaded from www.egger.com/perfectsense

PerfectSense Matt (PM)

The surface has a very low sheen, a matt finish with anti-fingerprint functionality and is available in an on trend muted colour palette.

Technical details

- Velvety touch and low sheen
- Anti-fingerprint properties
- Also available as laminate

PerfectSense Gloss (PG)

This surface is characterised by an ultra-gloss finish, distinguishing it from other classic gloss surfaces.

Technical details

- The reflection levels (mirror effect) until now have only been achieved with glass or acrylic.
- No image distortion or orange peel effect.

Matching products

PerfectSense Laminate

A matching PerfectSense Laminate is available for the 9 of the matt colours - only Alabaster White is excluded. The velvet matt finish also has the same anti-fingerprint technology as the PerfectSense Matt boards.

Laminate HG

The PerfectSense Gloss boards have a coordinating laminate in 9 of the decors. Due to a different manufacturing process the Laminate HG finish may vary in gloss level and colour tone from PerfectSense Gloss boards.

For areas such as carcassing, there is a coordinating MFC ST30 board for all PerfectSense Gloss colours. Available in a 2800 x 2070 mm sheet size with matching edging.

VDS

With EGGER's VDS solutions, you can visualise how your decor ideas will look in various room layouts! www.egger.com/vds

Edging

To achieve a perfect finish, each MFC/ MFMDF is also available in ABS edging, in the same decor and texture.

ABS Edging

ABS (Acrylonitrile-Butadiene-Styrene) is a chlorine-free thermoplastic edge that has a positive ecological balance. It is available in a variety of widths and thicknesses specifically manufactured to achieve the best match with coordinated products.

The quality of EGGER Edging is characterised by

- The solid colour featured in the core of the edging tape which matches the colour tone of the surface
- Its extra durability due to a protective lacquer on all decors.

Express delivery

- Individual rolls of edging can be provided by express delivery upon request.

Cut to width service

EGGER hold matching edging for all boards which are available from stock. As an additional service, widths which are not standard can also be ordered for all decors, offered in 0.8 or 2 mm thickness. Those special widths will be cut from a 75lm mini jumbo roll. The 100 mm wide roll can be cut to your required width - from widths of 12 mm.

Visit www.egger.com for more information on the cut to width service and to use the edging configurator. The configurator can be used to calculate the dimensions of cut to width edging available from one to four mini jumbo rolls.

PMMA Edging

PMMA Edges, which match the EGGER PerfectSense decors, have a unique finish with an intensive colour and allow you to produce high-quality furniture finishes. All PerfectSense Matt and Gloss decors are available as PMMA edging in 23 × 1.3 mm. For availability (⇢ page 6-15).

Seamless Edging

If an invisible glue line is crucial for you, special edging applied by Hot Air technology is available on request.

Accent Edging

Create eye-catching designs with the Accent Edging from the EGGER Decorative Collection. Changing the finer details for little cost or time can create a big impact.

Availability Accent Edging

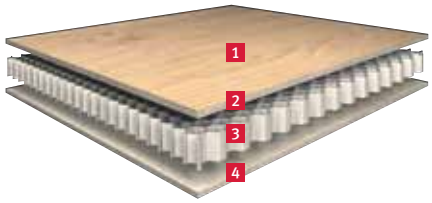
Eurolight Lightweight Boards

Combining design, lightness and strength, Eurolight Lightweight Boards are easy to process and install. The recycled honeycomb cardboard core makes these boards particularly sustainable. Available in a 38 or 50 mm thickness the Eurolight Lightweight Boards save fabrication time normally required to bond 2 boards together to achieve the same chunky look.

Eurolight boards are now more widely and more easily available.

Eurolight Lightweight Boards can be used in combination with the range of EGGER matching products - laminate, MFC and edging.

1 Decor
2 MFC 8 mm surface layer
3 Cardboard honeycomb core
4 MFC 8 mm surface layer



Eurolight Lightweight Boards consist of two 8 mm thick surface layers and a cardboard honeycomb core. They can be machined using standard tools and hardware. Due to the optimised thickness of the boards surface layers, the edges can be edged without inserting a frame.

Areas of application

Interior design and furniture, tables, doors, partitions and shelving.

Eurolight can open up new opportunities for your projects

- High value, chunky furniture
- Integration of electronic and electrical items into the furniture
- Invisible integration of cables

See more ideas and tips on
www.egger.com/eurolight

3 different finishes for various applications

Eurolight Raw

With raw surface layers, perfect for applications which require a laminate or veneered surface.

Board size: 2800 × 2070 mm × 38 or 50 mm.

Eurolight Painting Grade

Suitable for applications where the board will be lacquered (varnish, acrylic, DD, PUR, etc.)

Board size: 2800 × 2070 mm × 38 or 50 mm

Eurolight Decor

Melamine faced surface layers are a ready-to-use decorative solution. Matching edging is available in 43 × 2 mm and 54 × 2 mm.

Board size: 2800 × 2070 mm × 38 or 50 mm

For availability (→ page 6-15).

Technical data sheets and processing advice can be downloaded from
www.egger.com/downloads

A video showing the processing of Eurolight boards is available on
www.egger.com/video-eurolight-instructions

Laminates

Many of the MFC decors in the range have matching laminate available. Ideal for coordinating with MFC and for creating curved elements.

1 Overlay
2 Decor paper
3 Kraft paper
4 Balancer paper

Decorative laminate has a thermosetting resin base, consisting of several pressed paper layers, with a melamine resin-impregnated decor sheet on the surface and one or more papers impregnated with phenolic resin in the core (EN438-3). The laminate sheets must be bonded onto a substrate (normally particle board or MDF).

Areas of application

Furniture frontals, end panels, doors, worktops, island units and desktops.

Laminate quality	Format	Material features
Standard Laminate	3050 × 1310 × 0.8 mm	HGP* classification (EN438-3) Postformable
	Door format: 2150 × 950 × 0.8 mm 2150 × 1020 × 0.8 mm	MED* certificate (naval industry)
Laminate XL - Synchronised pore texture (ST28 ST29 ST33 ST37 ST38)	2790 × 2060 × 0.8 mm	HGS* classification (EN438-3)
		Non-postformable
PerfectSense Laminate	3050 × 1310 × 0.8 mm	HGP* classification (in reference to EN438-3)
Laminates with a HG texture	3050 × 1310 × 0.8 mm	HGS* classification (EN438-3)
		Delivered with protective foil
		Non-postformable
Decors with pearlescent inks	3050 × 1310 × 0.8 mm	ATP* classification (EN438-8)
		Vertical use only due to their lower resistance to scratching and abrasion

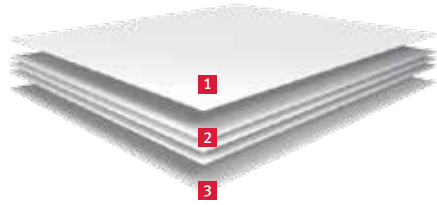
* Laminates Glossary

- HGP (EN438-3) Horizontal Grade (H), General Purpose (G), Postformable (P) laminate.
- HGS (EN438-3) Horizontal Grade (H), General Purpose (G), Standard Grade (S).
- MED Marine (M) Equipment (E) Directive (D).
- ATP (EN438-8) Pearlescent (A), Thin ‹ 2 mm (T), Postformable (P) laminate.

The majority of decors in the collection can also be coordinated:
See availabilty (⇢ page 6-15)

Coloured Core Laminate

1 Decor paper
2 Coloured kraft paper
3 Balancer paper



Decor range

W1001 HG Solid Premium White

W1001 ST9 Solid Premium White

W1101 ST9 Solid Alpine White

U7021 ST9 Solid Cashmere Grey

U7081 ST9 Solid Light Grey

U7881 ST9 Solid Arctic Grey

U9601 ST9 Solid Onyx Grey

U9631 ST9 Solid Diamond Grey

U9991 ST9 Solid Black

Coloured Core Laminate uses the same colour surface paper as the core running through the sheet.

The continuity of colour all the way through the laminate means that joins at a 45 degree angle now hide any join or glue lines, taking the potential for laminate to a new level.

With Coloured Core Laminate

Without Coloured Core Laminate

- Coloured Core Laminate is available in a sheet size of 3050 x 1310 mm in a 0.8 mm thickness.
- The 9 Coloured Core Laminates are non-postformable.

Worktops

The choice of worktop is increasingly the starting point of a kitchen scheme. With the increasing popularity of open plan living and island units, the worktop has grabbed centre stage.

How it then combines with the other furniture such as doors, end panels, shelving and flooring is crucial.

Our worktops have been developed to coordinate with the latest colour tones in kitchen design. We are uniquely positioned to do this because we produce the worktop as well as the materials that are used in other areas of the kitchen, such as doors and end panels, giving you the resources to achieve a coordinated look.

A ready-to-use solution for kitchens, bathrooms, offices, workbenches and counters.

To see the range go to: www.egger.com/worktops

H3452 ST36 Graphite Fleetwood in combination with worktop F312 ST87 Ceramic Chalk

H3309 ST28 Sand Gladstone Oak in combination with F311 ST87 Ceramic Anthracite

Product Advantages

- Easy to maintain
- Moisture-repellent surface
- Hygienic
- Excellent resistance against abrasion
- Matching edging included
- Durable and impact resistant

Unlike solid wood worktops, EGGER worktops don't require ongoing and regular maintenance such as oiling or sanding. They are also significantly less likely to fade in sunlight.

Accessories

Our splashbacks and upstands can create the finishing touch to the overall design of your kitchen. Whether it's matching or contrasting, we have something for you.

F283 ST22 Boston Concrete

F312 ST87 Ceramic Chalk

Worktop Visualiser

To see any of the EGGER worktop finishes in-situ please use the worktop visualiser at www.egger.com/worktops-visualiser.

Check how certain combinations of worktops, splashbacks and upstands work with doors, shelving and drawer fronts.

For additional information on the worktop offering from EGGER please refer to our website or order the worktop brochures at www.egger.com/shop

Services

We don't just offer you high product quality and the latest trend orientated decors – but also a wide range of helpful services.

Visualisation

See the latest laminate designs in-situ now. A range of visualisation tools are available from EGGER to bring decor designs to life.

EGGER Virtual Design Studio (VDS)

Using the EGGER Virtual Design Studio (VDS) software you can view any of our decors in a room set. Choose matching furniture and doors or try out complementary coordinating decors throughout a room design.
Available free as part of the new EGGER App or online at www.egger.com/vds.

EGGER Decor Scans

All of the EGGER decors are available as decor scans to download into your own CAD systems and design software.
See www.egger.com/myegger or contact productsupport@egger.com.

EGGER App

For convenient offline access to all of our decors as well as room visualisation software and an 'Inspiration' section, download the new App via the App Store or Google Play Store.

Need a sample?

For free samples order online at www.egger.com/shop.
